

FOOTHILL ENT CARE SPECIALISTS INC.

DR. LEWIT WORRELL

DRUGS THAT CAUSE BLEEDING PROBLEMS

Two weeks prior to surgery, vitamin E, aspirin, or aspirin products and medication containing ibuprofen should be discontinued because they promote bleeding.

If you must take something for headache, menstrual cramps or other aches and pains, you may take Tylenol (Acetaminophen) As directed for the time prior to your surgery. Check the labels on any medicine you plan to take in pill, capsule, or liquid form. Do not take anything containing acetylsalicylic acid or salicylates.

Your cooperation can help us avoid bleeding complications with your anticipated surgery.

REMEMBER: TYLENOL ONLY FOR PAIN
